🎯 **What:** The code health issue addressed was the use of the deprecated `datetime.utcnow()` method.

💡 **Why:** `datetime.utcnow()` is deprecated in favor of `datetime.now(timezone.utc)` to provide more consistent and clear handling of timezone-aware datetime objects.

✅ **Verification:**

- Confirmed the new syntax works in the environment.
- Ran `python3 sync_repo_map.py --dry-run` to ensure no `DeprecationWarning` is issued for the updated lines.
- Performed a syntax check using `py_compile`.
  ✨ **Result:** Improved maintainability and future-proofing of the `sync_repo_map.py` script.

👋 Jules, reporting for duty! I'm here to lend a hand with this pull request.

When you start a review, I'll add a 👀 emoji to each comment to let you know I've read it. I'll focus on feedback directed at me and will do my best to stay out of conversations between you and other bots or reviewers to keep the noise down.

I'll push a commit with your requested changes shortly after. Please note there might be a delay between these steps, but rest assured I'm on the job!

For more direct control, you can switch me to **Reactive Mode**. When this mode is on, I will only act on comments where you specifically mention me with `@jules` . You can find this option in the **Pull Request** section of your global Jules UI settings. You can always switch back!

New to Jules? Learn more at jules.google/docs.

For security, I will only act on instructions from the user who triggered this task.

Pull request overview

This PR modernizes the datetime handling in `sync_repo_map.py` by replacing the deprecated `datetime.utcnow()` method with the recommended `datetime.now(timezone.utc)` approach. This change ensures compatibility with current Python best practices and eliminates deprecation warnings while maintaining identical functionality.

Changes:

- Updated two instances of `datetime.utcnow()` to use `datetime.now(datetime.timezone.utc)` for timezone-aware UTC timestamps
